

ASCENSCIA

PIONEERING SCIENCE

AI- Voice Assistant for Scientific Labs

Ahmed Khalil | Co-Founder & CEO

50% of Preclinical Drug Discovery Research is **Irreproducible**

The reproducibility crisis is a pressing issue in scientific research largely driven by **poor data management**, leading to waste of time and resources by:

28B USD/year only in the US alone)

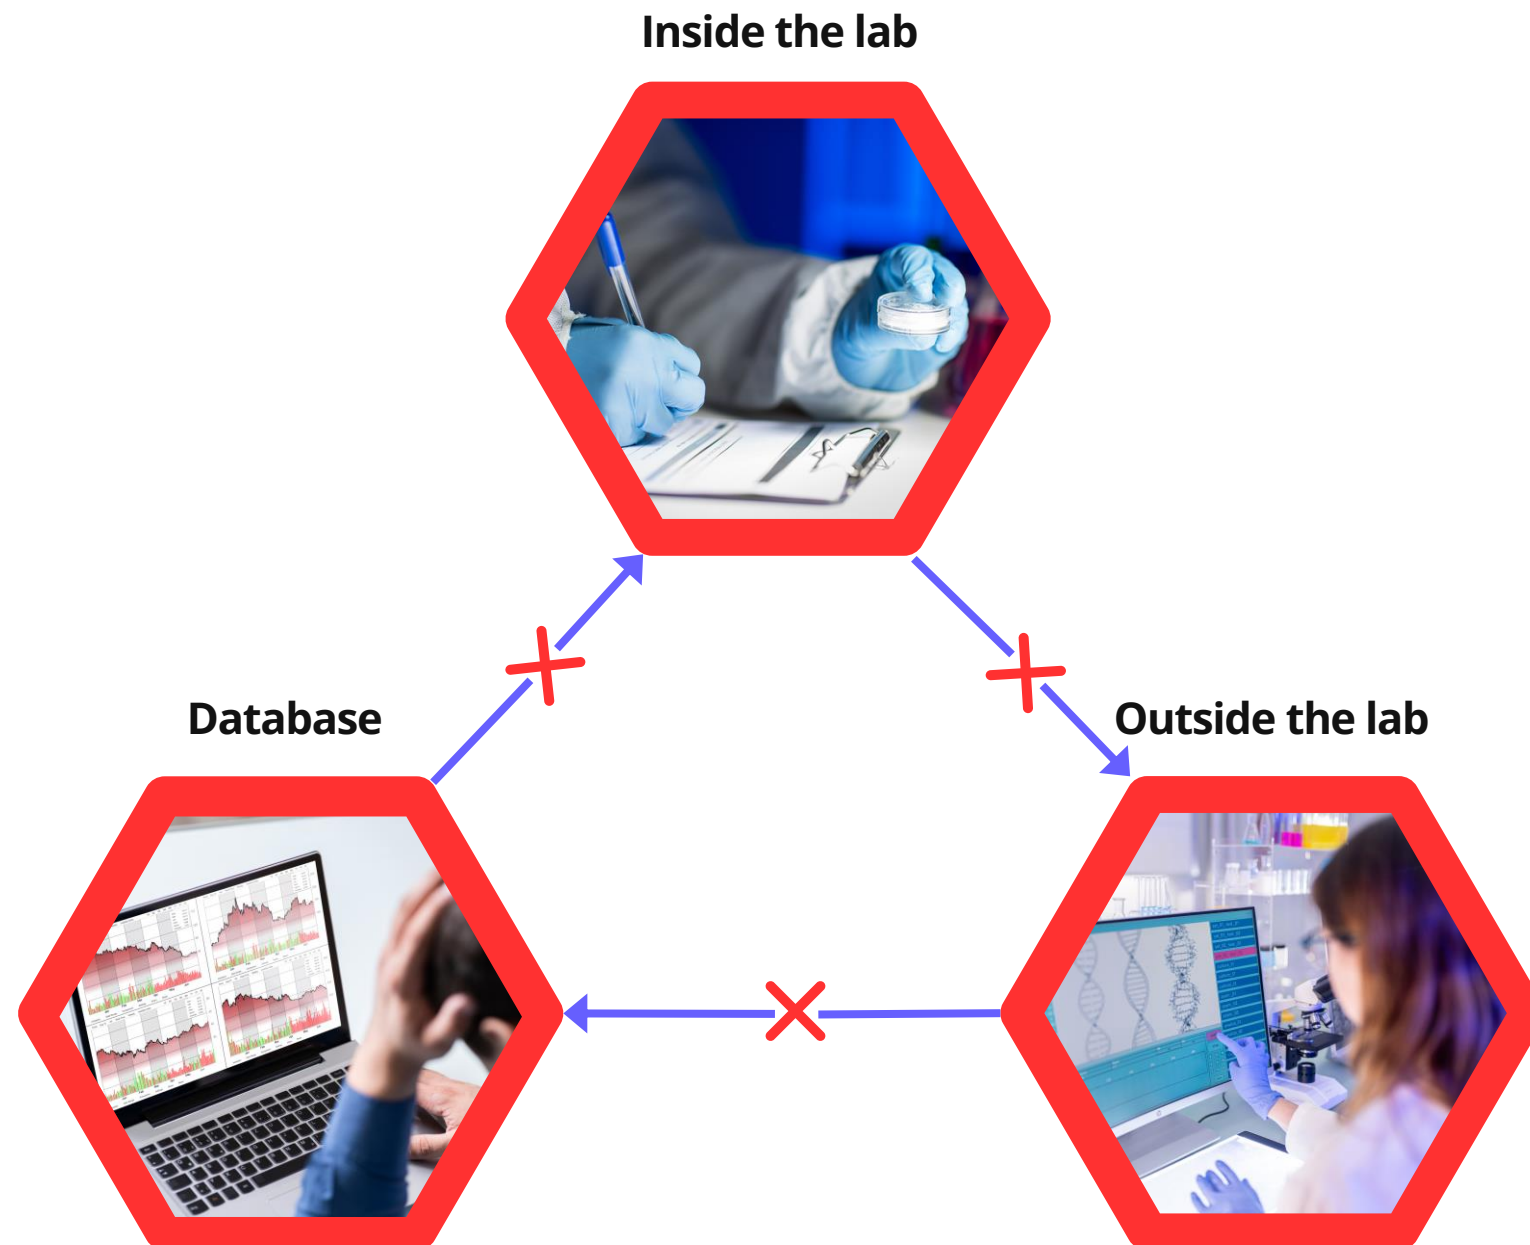

Significant delays in R&D pipelines

Lack of reliable data sources

Inefficient Lab Workflows & Interrupted Data Flow

30% Time wasted on manual data entry.

60% Data loss due to gap of transferring data.

25% lower productivity due to distractions

Pipelines delays and extra costs due to lack of data & repeating experiments

* **Electronic Lab Notebooks (ELNs)** are web or cloud based data management platforms commonly used in scientific research. These platforms enable researchers and scientists to document their experiments, observations, and data electronically rather than using traditional paper notebooks.

Introducing ASCENSCIA

Ascenscia is the “Siri” or “Alexa” for scientific labs. Our **mobile application** integrates seamlessly with various ELN systems as an add-on solution. The app enables scientists to **capture and access their data through hands-free voice interactions**, increasing quality of data captured and **optimizing lab workflows**.

Available on:

Real-life Use Case

Our product was developed and validated with **50 scientists** from academia and industry

Traditional Lab Workflow

- ✗ "I struggle to keep up between my experiments & writing down my notes".
- ✗ "I lose track of my notes and I forget what I exactly did in my experiment".
- ✗ "I waste a lot of time in transferring my data from paper to my ELN".

Workflow with ASCENSIA

- ✓ "Taking hands-free notes by voice keeps me focused on my experimental workflows with less distractions".
- ✓ "I am able to capture every detail of my experiments & easily track back any deviations in my work".
- ✓ "All my data are synced with my ELN. I do not need to spend time on documentation any more!"

Simplified Lab Workflows & Improving Data Flow with Voice

30% time saved by automating data collection with voice.

40% higher quality data through seamless data structuring into ELNs

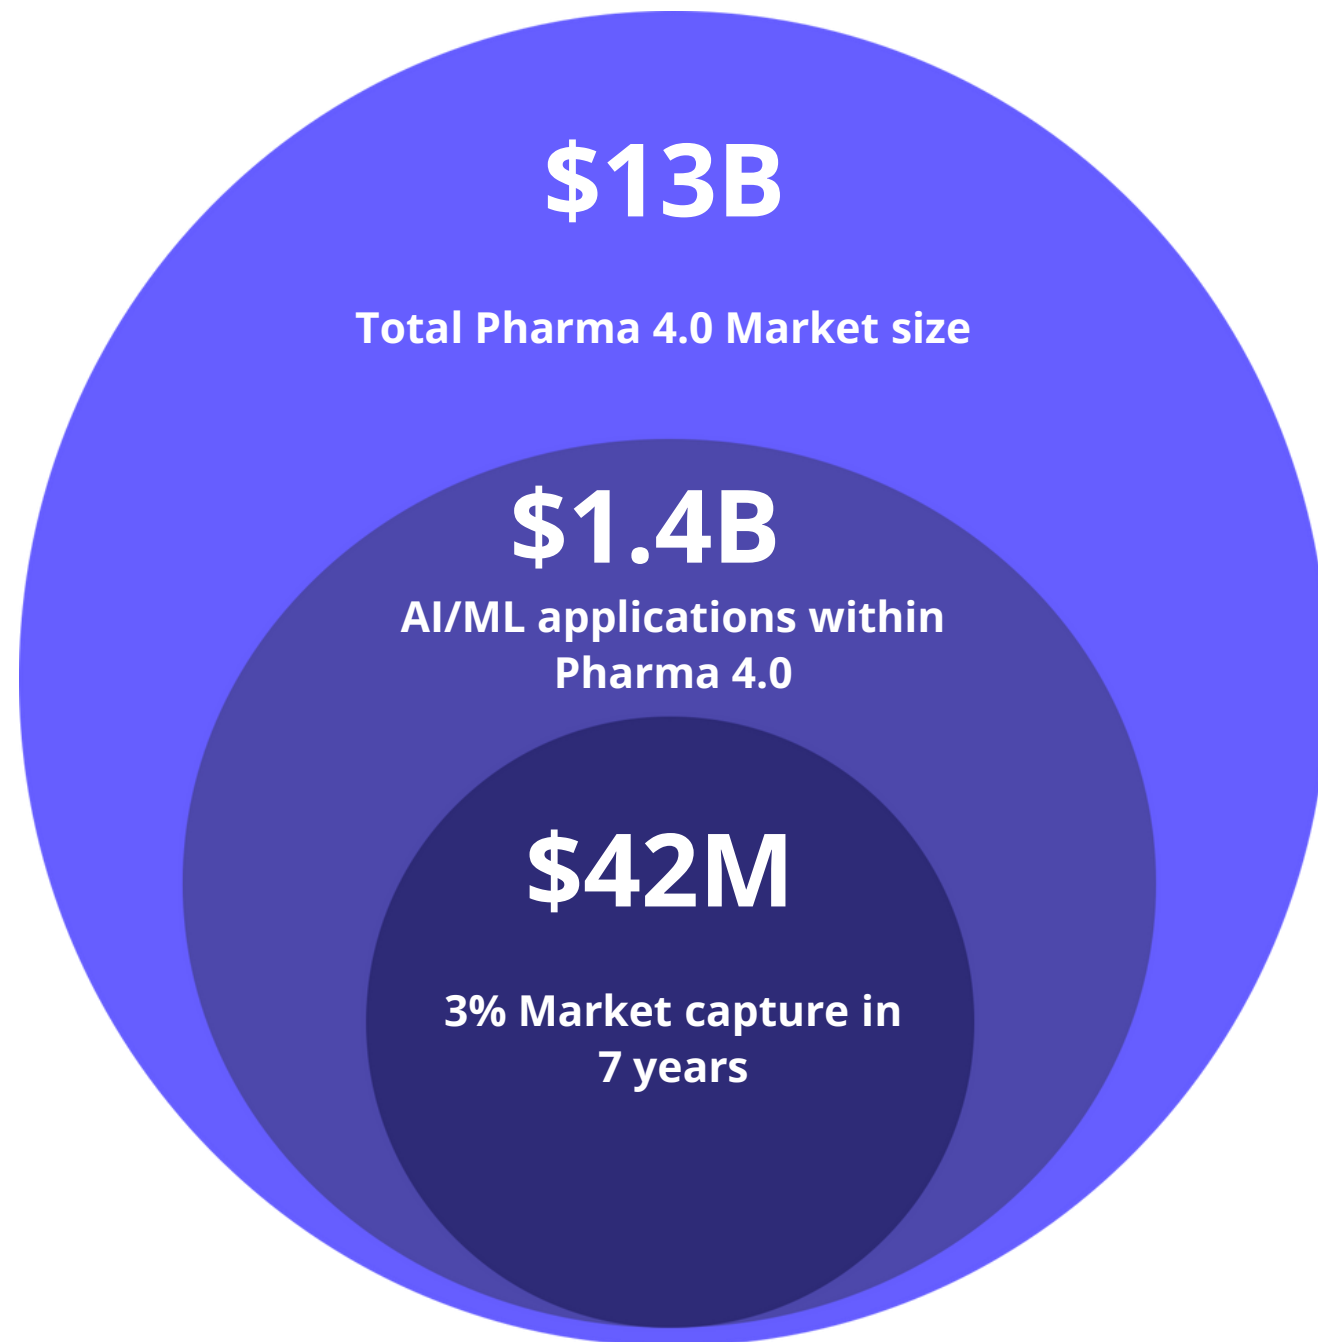

25% higher productivity by minimizing distractions & reducing workload

Reducing R&D cycles & costs by improving data use & reducing experiments.

Pharma 4.0 - Why now?

Growing Market

Pharma 4.0 market is estimated to grow by CAGR 18.9% in the next 10 years.

Market Trends

Investing in **Data Strategy** is increasingly becoming a necessity in the market to become **AI-ready**.

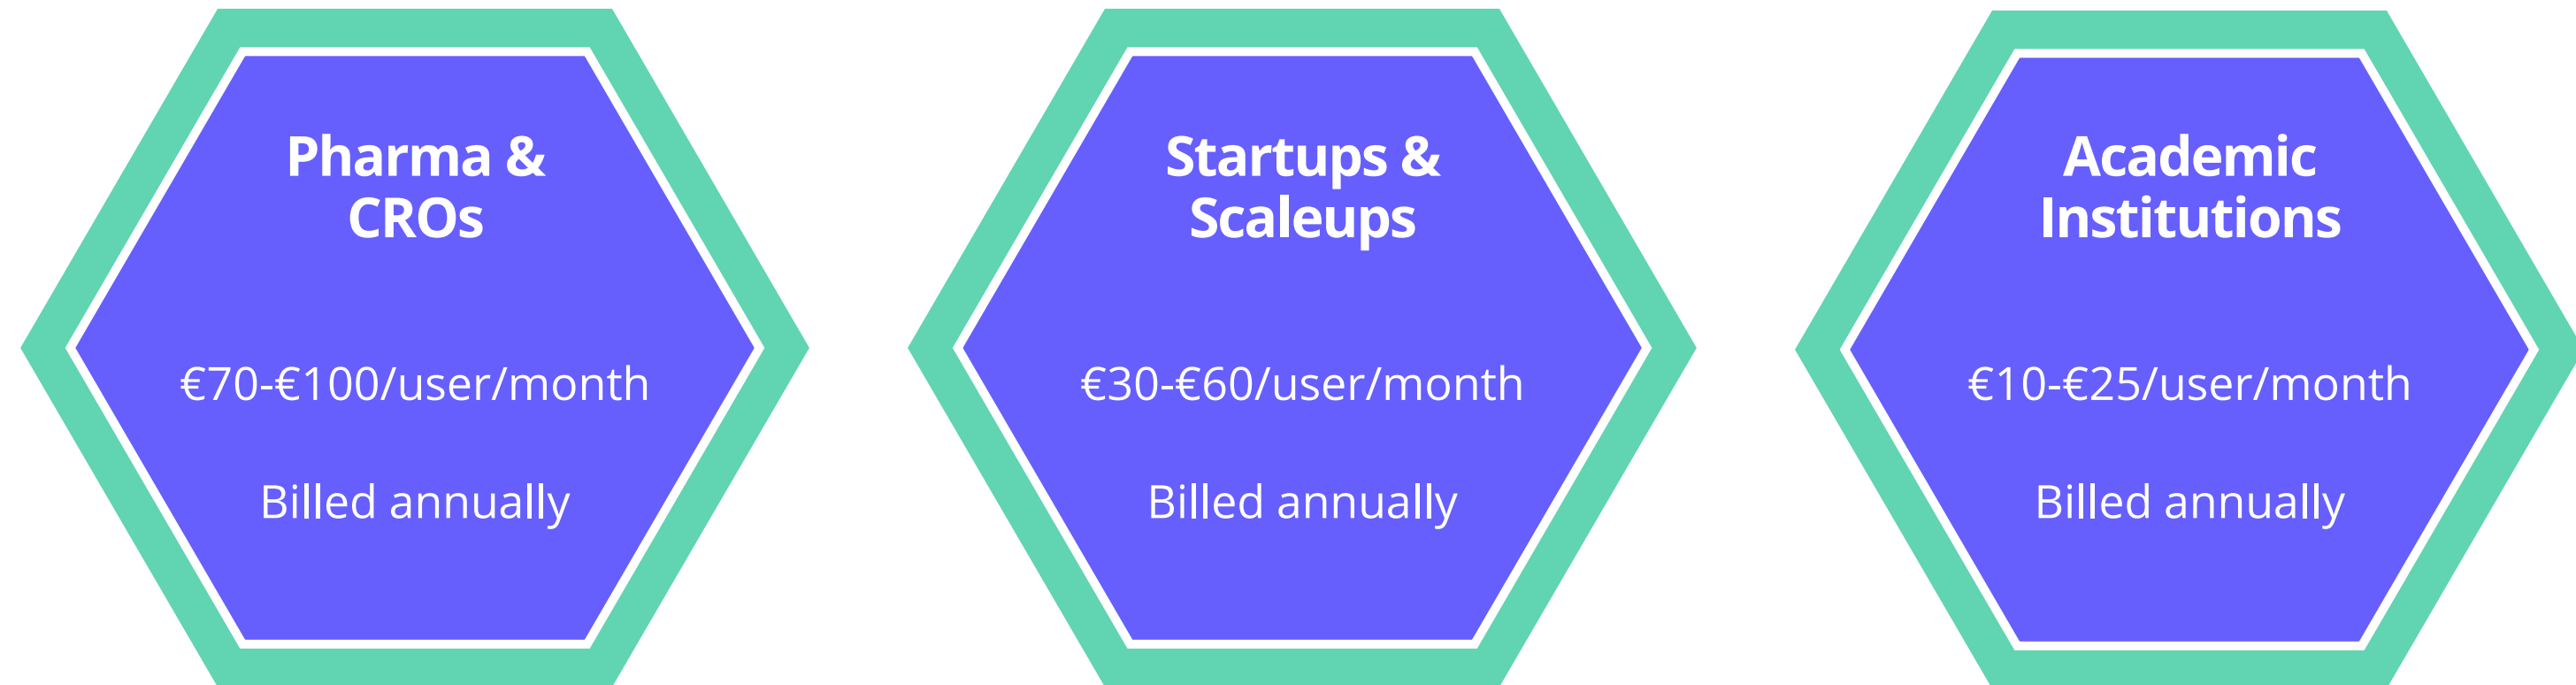

Competitive Edge

Lab digitisation and lab automation are the **new competitive edge** in the pharma industry.

Business Model - B2B Saas

Focusing on **Pharma & Biotech*** pre-clinical drug development

*We also identified opportunities for expansion into other (lab) industries
(**Food & Beverage, Semi conductors, Agricultural & Material sciences**)

Market Players – Voice Tech for Scientific labs

Competitive edge as an [add-on solution](#)

	LabVoice (2018)	LabTwin (2018)	ASCENSCIA (2021)
Voice accuracy	-	95%	97%
Custom voice features			
Flexible integrations			
User-centered design			
Translation option

Core Team

Ahmed Khalil

Co-founder & CEO
MSc. Drug Innovation

8+ years in sales and business development in pharma and drug discovery

Lirry Pinter

Co-founder & CTO
MSc. Information Studies

7+ years experience in UX design, software development and AI/ML

Sherouk Soliman

Marketing Manager
MSc. Biomedical Sciences

5+ years experience in Life Sciences communication and marketing

Rayyan Jafri

Senior Developer
BSc. Computer Sciences

10+ years full stack developer and mobile app

Ronald Vos

Senior Business Developer

25+ years business development in Life sciences & Diagnostics

Frankie van Dooren

Junior Developer
BSc. Business Innovation

3 years experience as front-end developer

Advisors

Mozhde Aliakbari

AI/ML Expert and data strategy, supporting the team in developing AI/ML models as an advisor on project bases

Dirk Aulike

20+ years in lab automation & lab software industry
Serial entrepreneur

Traction - Why Us?

Accelerators

€630K Funds

Sales traction

first 2 clients (27k ARR)

Running 4 pilots

Current Sales pipeline value (500K ARR)

8 ELN Partners

It's time to grow!

Now

**850k - 1.2M
Pre-Seed Round**

For a runway of 24
months

(70%) Team expansion

Low: 1 developer, 1 med Sales

High: 2 developers, 1 Senior Sales, 1
CSM

(20%) Commercial Activities

International conferences, Ad
campaigns, sales activities with
partners

(10%) R&D (Product Dev)

- Training & Improving
Our AI models in lab ops.
- Natural Speech AI models.

2026

**Boost Sales &
technical operations**

Drive revenues to break-
even by the end of 2026
(660k ARR).

Thank you

I think the biggest innovations of the 21st century will be at the **intersection of biology and technology**. A new era is beginning.

~Steve Jobs

Distributors**

Moving Forward...

Key Opportunities:

Focus on Biotech SMEs for Rapid Growth

Target small and medium-sized biotech companies for faster revenue cycles, while gradually engaging big pharma for sustained, long-term growth.

Streamline Sales Operations

Optimising our sales process and capacity to allow our team to efficiently manage a growing number of leads. This includes reducing technical overload and ensuring effective lead nurturing.

Increasing demand on voice to ELNs

ELNs and ELN users are increasingly asking for voice integrations. We are an increasing number of new ELN partnerships, which can drive growth if managed effectively.

Capital & Resources Allocation:

Team Expansion and Capability Building

Hiring additional sales & technical team members to support accelerated growth and maintain high levels of customer success.

Targeted Marketing

Allocate budget for a targeted marketing strategy focusing on high-growth Biotech SMEs through our validated marketing channels: conferences, online ads, startup incubators and ELN client base to accelerate lead generation.

Strategic Partner Development

Use funds to maximise the current ELN partnerships' value by hiring a CSM. Additionally, we will establish new partnership integrations and nourish existing partnerships to drive co-sales for consistent revenue generation.
